

# Andy Watson

A: 9401 Roberts Dr. Sandy Springs, GA 30350 T: 404.918.5263 E: awatson0987@gmail.com  
Web: andywats0n.github.io

The logo consists of the lowercase letters 'dw' in white, set against a solid blue square background.

## Objective

A highly motivated self-starter with strong work ethic, eagerness to learn, & professional experience building software in an agile environment. I thrive in collaborative environments, possessing impeccable communication & interpersonal skills. I am looking for a challenging new experience to push my software development career to the next level.

## Experience

### Toolbox No. 9

Aug '17 - Present

#### Front-end developer

- o Work with designers & developers to develop modern, intuitive user interfaces
- o Collaborate & contribute to the design, look & feel of our web applications
- o Work in a team environment with shared code; disciplined use of source code control & process documentation
- o Adhere & recommend improvements to project coding standards
- o Experience with popular JavaScript libraries & frameworks like React, Vue & Angular
- o Experience developing mobile applications with React Native
- o Experience translating wireframes into usable interfaces
- o Good understanding of browser compatibility & web standards
- o Actively participate & manage multiple projects simultaneously
- o Advanced knowledge of HTML, CSS, JavaScript, & the DOM
- o Good understanding of Object Oriented Design
- o Working knowledge of Photoshop & Sketch
- o Experience working with relational databases - MySQL & PostgreSQL
- o Developed mobile applications for Android & iOS

### Jimmy John's

Aug '13 - Aug '16

#### General Manager

- o Managed teams of 20+ employees and maintained COGS to achieve a profitability growth year-over-year of over 20%+, designating it as one of the fastest growing locations in the region

## Certifications

- o ReactJS Codecademy Pro Intensive Certification
- o Attending Georgia Tech in the fall for Data Engineering boot camp
- o Actively pursuing AWS Associate Developer Certification

## Projects

- o Developed a chrome extension currently being published to the Chrome Web Store
  - o Asynchronously fetches & consumes data from the twitch.tv API to display in a minimal, easy-to-use interface
- o Contributed to full stack web app built with Ruby on Rails for Kroger
  - o Pulled & consumed data from Eventbrite API to create features such as user registration & payment processing via Stripe to create a fully featured web app
- o Donated Wordpress site to an Atlanta community
  - o Built out a simple web interface so the community could view upcoming events & important information about the community
- o Contributed to React Native mobile application
  - o In an agile environment, 2 devs & 1 designer built an alpha for a cross platform mobile application in just 4 short, 2-week sprints
- o Updated & maintained an Android app for Cartoon Network
  - o App designed for kids with challenges to post videos that would upload to Cartoon Network's database
- o Currently building kanban board for a game jam planned Summer 2018

## Education

### University of North Georgia

Jan '15 - May '17

Bachelor of Science in Computer Science
